Mr. does  
does Oliver eat sausages?

Oliver is 5 today. Next week I will be 8.

I need something that I like  
to give to my good mate.

I wonder... does Oliver eat sausages?

SPELLING  
TIP OF THE  
WEEK

The  $\times 3$  tic-tac-toe grid can be easily imagined (use your mind's eye) on your palm.

Now practise 'seeing' the  $\times 3$  tables by combining the numbers (1-9) together with the correct level numbers. Notice that **5** is in the middle of your palm grid.

What is  $3 \times 7$ ? Skip across your fingers' pads **7 times**. You have landed on number 1 with a level 2, which makes it **21**.

Fill in a blank tic-tac-toe grid with 1-9 numbers, starting **from the bottom up**.

It's the bottom-up way because we're **building up** our  $\times 3$  grid.

Now give the grid levels 0, 1 and 2 (in the opposite direction to building)
